

ENVIRONMENTAL TRAINING

GENERAL

Hofstede & Associates, the consultancy and training division of Spartel Pty Ltd., has over 50 years experience in the waste management and pollution control industry. Using the experience from a team of dedicated professionals, Hofstede & Associates provide detailed training programs targeted mainly at government employees of developing countries to enable them to develop and implement realistic and useful clinical environmental and waste management strategies for their communities.

Courses are tailored to the specific requirements of the participants. Courses that we offer cover areas such as Environmental Management Principles, Hazardous Waste and Industrial Pollution Control, Waste Management and Environmental Planning Practices.

The design of each course is based on experiential learning and current scientific knowledge. Every session contains practical activities, problem solving or team building activities, case studies, small group work or individual work. Lectures and information sessions will be interspersed with practical, directed activities. The courses are designed to be practical, informative, useful and enjoyable.

Practical training course in action
